### Profile Summary

- I am a skilled front-end developer with a strong foundation in HTML, CSS, and JavaScript, dedicated to creating responsive and visually appealing websites.
- With knowledge in UI/UX design, I focus on building intuitive user interfaces that enhance user experience across all devices.
- I have successfully developed a range of front-end projects, showcasing my ability to translate design concepts into fully functional, responsive websites and web applications.

### Academic Projects

#### Personal Budget Tracking web App

##### Made using: HTML, CSS, JavaScript

Users want an easy tool to track their income and expenses to manage their money effectively.

Key Features:

- Real-time Financial Management: Input income and expenses with instant updates to the budget summary.
- Transaction List: Displays a detailed list of transactions with descriptions, amounts in INR, and types (income or expense).

#### Weather Dashboard:

##### Made using: HTML, CSS, JavaScript

A quick way to get weather updates for their location.

Key Features:

- Real-time Weather Data: Provides current weather conditions for any location.
- User-Friendly Interface: Clean design that adapts to various devices.
- Detailed Information: Shows temperature, humidity, wind speed, and weather conditions.
